COMPETENT SKILLS

Full Stack Web Development

Responsive Web Design

User Experience (UX) Optimization

Framework Proficiency

Backend Integration

Database Management Implementation

Personal Project Development & Showcase

Web Application Security & Performance

Cross-Framework Adaptability

Dynamic Data Visualization

Real-time Application

Persistent Data Storage

Collaborative Teamwork

Leadership

PROFILE

Dynamic Full Stack Developer with a proven track record in end-to-end website design and development. Demonstrated expertise in creating seamless user experiences through optimized desktop and mobile responsive designs. Proficient in translating design mockups into seamless web pages, with a keen eye for detail and aesthetics. Adept at optimizing web applications for maximum speed and scalability, while ensuring cross-browser compatibility. Comprehensive portfolio of personal projects showcases adaptability in both React and Angular frameworks, emphasizing on functionality, interactivity, and user engagement. Actively seeking a Frontend Developer position to further contribute and innovate in the field of web development.

EXPERIENCE

Full Stack Developer   **Date**
theinsuranceladyofatlanta.com

- Spearheaded the design and development of Theinsuranceladyofatlanta.com, ensuring a seamless user experience.
- Optimized the website for full desktop and mobile responsiveness, enhancing accessibility for users on multiple devices.
- Revamped front-end features using Angular and React to elevate user interface and experience.
- Introduced and integrated NodeJs/Express API endpoints, bolstering site functionality with new and improved features.
- Overseen and streamlined the management of an AWS RDS-hosted MySQL database, ensuring its optimal performance and security.
- Integrated sophisticated RESTful APIs to facilitate complex query operations, enriching site interactivity.
- Leveraged 3rd Party APIs & HTML5 Browser APIs to expand site capabilities and enhance feature offerings.

Full Stack Developer   **Date**
shalewevent.com

- Spearheaded the end-to-end design and development of Shalewevent.com, resulting in a user-centric online presence.
- Achieved full desktop and mobile optimization, boosting site accessibility for diverse device users.
- Elevated website's aesthetic and functionality by enhancing front-end features with Angular and React.
- Deployed the integration of NodeJs/Express API endpoints, enhancing the website with advanced and contemporary features.
- Supervised and ensured optimal performance of a MySQL database hosted on AWS RDS, guaranteeing data integrity and reliability.
- Seamlessly integrated RESTful APIs, facilitating efficient and intricate query operations for a robust user experience.
- Harnessed the power of 3rd Party APIs & HTML5 Browser APIs to amplify the site's functionality and interactivity.

PROJECT HIGLIGHTS

Polling Fullstack App
React Version: https://iipollreact.com/
Angular Version: https://iipoll.com/

- Developed a versatile polling application compatible with both React and Angular frameworks.
- Leveraged AWS RDS to manage a MySQL instance, ensuring secure and efficient data storage.
- Enabled users to seamlessly craft polls and cast votes on diverse submissions from the community.
- Integrated Highcharts Piechart API for a dynamic visual representation of voting results.

Mapbox Weather App
React Version: https://jlowe1210.github.io/weather_app_react_v2/
Angular Version: https://jlowe1210.github.io/angular-weather-app-v2/

- Developed using both React and Angular frameworks.
- Integrated MapBox API for intuitive point-and-click global weather retrieval.
- Employed OpenWeather API to provide real-time weather updates for selected locations.

Simplechatapp
React Version: https://simplechatapp.com/react/
Angular Version: https://simplechatapp.com/angular/

- Developed seamlessly in both React and Angular frameworks.
- Enabled real-time chat functionalities via Socket.io.
- Integrated AWS RDS to ensure a stable MySQL instance for efficient data storage and retrieval.

Indecision App
React Version: https://jlowe1210.github.io/Indecision-App-react-redux/
Angular Version: https://jlowe1210.github.io/Indecision-App-Angular/

- Allows users to input tasks and randomly selects one for execution.
- Utilized LocalStorage API for persistent task storage.
- Expertly designed in both React and Angular frameworks.

Hangman
React Version: https://hangmanreact.com/
Angular Version: https://jlowe1210.github.io/hangmanangular/

- Skillfully developed across both React and Angular frameworks for a versatile user experience.

TECHICAL SKILLS

Languages: HTML5, CSS3, Javascript (ES6), Sql(MySql), Mongo

Frameworks: Bootstrap, React, Sass (Scss), Jasmine, Angular , Node, Express js, Mongoose, Objection js

Tools: Git, Github, Chrome Dev Tools, Command Line, Responsive Design, Gulp, RESTful APIs, AJAX, JWT, AWS
